## A successful range of products

Innovation, research, development and sustainability are the keywords that have contributed to Filmop International growth. The Venetian company has always been successful thanks to its capacity to feel, get, understand and anticipate the requests and needs in the market; this is what differentiates a leading company from all the other ones operating in the same field.

Since its establishment the company has always been investing a lot in new technologies, thus being **one of the main figure** in the changing process affecting professional cleaning during the last 30 years.

In particular, Filmop International was the first Italian manufacturing company with a special attention to:

- **The importance of metal-replacing materials**, such as polypropylene, very strong, light and completely recyclable
- **The necessity to separate clean water from rinsing water**, a fundamental issue for a professional cleaning
- **Ergonomic cleaning systems** in order to make easier and improve the working conditions of the operators in the cleaning field

These three concepts are the main pillars of a successful business and production policy, that has led to a complete range of products for professional cleaning with more than 4.000 finished items.

# Filmop International engagement towards environment preservation and sustainable development

In an age in which the preservation of our environment is the world top priority, Filmop International is strongly engaged and oriented towards a policy of sustainable development.

Sustainable development is a process of change finalized to improve environmental, economic, social and institutional conditions of nations. This process implies an exploitation of natural resources, a direction of investments and an orientation of technological development totally respectful of the needs of today and future generations.

Filmop International contribution to these important goals finds fulfilment in its engagement:

- **To make the most of each person as a human being:** the company has a modern and avant-garde structure with wide offices featuring individual booths and working tools, respecting healthcare laws, bright warehouses and industrial machines in compliance with workers' safety. Moreover, Filmop International is strongly against the exploitation of minors' work, offers continuous employment to disabled people and can boast a staff with long term seniority (15 – 20 years).
- **To protect the environment:** today, compared to the past time, there are surely the means and knowledge to make conscious choices for environment preservation. Favouring products in compliance with EU laws and manufactured by certified companies can really make the difference.

Since the very beginning the company has indeed undertaken **a clear path towards eco-sustainability**. Many are the steps that translate the green soul of Filmop International into several concrete and certified results:

- Efficient organization of the separate collection of waste and leftovers deriving from production processes
- Environmental certifications
- Use of recycled raw materials
- Constant investment in the design of low environmental impact products, lasting over time and ergonomic for the benefit of workers health
- Selection of qualified suppliers according to REACH regulation for the supply of non-polluting, high-quality raw materials
- Offer of a wide range of 100% recycled products
- Energetic autonomy in the textile production: a photovoltaic plant has been functioning since 2011 and has made it possible an annual medium reduction of 110 ton of CO<sub>2</sub>

FILMOP INTERNATIONAL CONTRIBUTION TO SUSTAINABLE DEVELOPMENT FINDS FULFILMENT IN ITS ENGAGEMENT TO MAKE THE MOST OF EACH PERSON AS A HUMAN BEING AND TO PROTECT THE ENVIRONMENT

## Our certified products:

### Plastic Second Life

Confirming its own engagement to protect and respect the environment, and in compliance with the laws concerning the **Green Public Procurement**, Filmop International is proud to be the very first Italian manufacturer of janitorial products to get the **Plastic Second Life** certification by the Institute for the Promotion of Recycled Plastics (IPPR).

**PSV** (Italian acronym for Plastic Second Life) is the first Italian and European trademark for recycled plastic materials; a product's environmental certification to guarantee, highlight and identify more easily all products manufactured by using recycled plastics, simplifying the selection criteria for public authorities and for other companies, that are interested in buying eco-sustainable products.

Nowadays public authorities are obliged to meet their annual requirements for manufactured products and goods with a minimal level of products manufactured with recycled materials (Italy has taken into consideration the rules concerning Green Public Procurement with the law 448/01, the ministerial decree D.M. 203/03 and the ministerial memorandum dated 4 August 2004); consequently, all cleaning distributors selling to public authorities have now the possibility to offer PSV certified products and this means to be qualified as preferred suppliers in accordance with the policies defined in the **CAM** criterias (**Criteri Ambientali Minimi = Minimum Environmental Criteria**).

### EU Ecolabel

Filmop International has obtained the prestigious **Ecolabel UE** certification for its **RAPIDO SUPER** microfiber mops, the most common and widespread European Union environmental quality label among consumers.

EU Ecolabel rewards the best low environmental impact products, qualifying them in the market and differentiating them from the competitors, after having evaluated their sustainability over their entire life cycle through a very selective series of parameters established by the European Union.

According to the **National Action Plan** of Green Public Procurement (**PAN GPP**) this product certification, classified as Environmental Label Type I, is indeed the main reference for the identification of the **best products** from the point of view of **environmental sustainability** and, consequently, it is at the basis of the Italian legislation in relation to Green Public Procurement.

«...These "Minimum Environmental Criteria" are highly consistent with the criteria for the award of the "Community EU Ecolabel" trademark...» - (Extract from **CAM for the cleaning service** - D.L. dtd 24 May 2012)

The complete range of Rapido Super microfiber mops with EU Ecolabel certification is available in the official web site of Ispra Ambiente, see the web page: <http://www.isprambiente.gov.it/it/certificazioni/ecolabel-ue/prodotti-certificati>

**Dry-Up, the high absorbent disposable cloth** made by Filmop, lets you solve any loss of liquid instantly: thanks to its performances, surfaces dry very quickly with the highest hygiene, allowing to continue with the ongoing activities.

- **High absorbency in a few seconds:** the high absorbing polymers of the cloth soak up till 1000 ml from 30 to 150 seconds. Absorbing time and capacity depend on the type of liquid: Dry-Up can indeed absorb water, drinks, chlorine bleach, oil, urine and blood.
- **Maximum safety and hygiene:** the absorbed liquid is bonded safe in the cloth and transformed into gel, allowing a safe and hygienic disposal of the cloth, neither dripping nor trickle, and avoiding cross contamination.
- **High versatility:** perfect to be used in healthcare facilities, elderly homes, restaurants, bars, supermarkets, communities, schools, airports, public toilets, industries, mechanical workshops.

Put Dry-Up onto the leakage of liquid and wait until it absorbs it completely. If necessary, move it slightly without lifting it to absorb the rest of the liquid. Do not step on it, because it could be slippery.

Remove Dry-Up. The liquid, now transformed into gel, is bonded safe in the cloth, avoiding dripping and trickling. Dry-Up leaves the surface completely dry, allowing a fast restart of ongoing activities.

Dispose of the cloth as general waste (please, comply with the specific protocol for hospital waste). Then proceed with the cleaning of the area.

## FILMOP YARNS

### COTTON

70% Cotton - 30% Polyester

Natural highly absorbing fiber that keeps dirt, releasing it only during the washing of the mop. Ideal for all inside floors with a medium degree of dirt.

### POLYESTER-COTTON

70% Polyester - 30% Cotton

The combination of cotton, a natural fiber with a high absorbing level, and polyester, a synthetic fiber very strong and resistant to washings, guarantees a perfect running of the mop on the floor. Ideal for all inside floors with a medium degree of dirt.

### MICROFIBER

80% Polyester - 20% Polyamide

**Microfiber** is a synthetic fiber which penetrates deep into the grooves and pores of floors, absorbing the removed dirt and retaining it till mop washing. Ideal for all inside floors with a medium degree of dirt.

### RAPIDO

80% Polyester - 20% Polyamide

The **microfiber** easily slides on the surfaces, efficiently removing all dirt. The high level of absorption ensures excellent cleaning properties, while the resistance to washing guarantees long life. Ideal for all inside floors with a medium-high degree of dirt.

### RAPIDO SUPER

80% Polyester - 20% Polyamide

**Ultra-microfiber** guarantees excellent cleaning results, higher efficiency and smoothness thanks to its fibers which penetrate into the grooves and pores of floors. Ideal for all inside floors with a medium-high degree of dirt.

### MICROFIBER-COTTON-POLYESTER

70% Polyester - 30% Cotton

**Microfiber** better releases the micro-particles of dirt, cotton improves the absorbing capacity of the mop, covering more washable square meter, while polyester allows an easier running of the mop on the floors. Ideal for all inside floors with a medium-high degree of dirt.

### MICRO-ACTIVA

85% Polyester - 15% Polyamide

Specific variety of **microfiber** ideal for dust mopping thanks to the electrostatic properties of its fiber, washing and pre-soaking. Thanks to its internal microfiber, it has a high absorbing capacity. Ideal for the washing of smooth surfaces with a medium degree of dirt.

### PULI-SCRUB

50% Polyester - 20% Polyamide - 30% Polypropylene

**Microfiber** with polypropylene inserts which ensure a great removal action of dirt while offering excellent smoothness. Ideal for non-slip floors with a medium-high level of dirt.

### SMART-FUR

100% Polyester

Thanks to its very thin fibers, **microfiber** acts physically and mechanically on particles of dirt removing and trapping them in its fibers. Ideal for dust mopping thanks to the high electrostatic power of its fibers and for spray cleaning.

### ACTIVE-FUR

90% Polyester - 10% Polyamide

**Microfiber** with nylon inserts for a lower mop friction and a better dirt collection. Ideal for the washing of smooth surfaces with a medium degree of dirt.

### SKILL-FUR

80% Polyester - 20% Polyamide

**Microfiber** with stripes. Its special composition provides a perfect balance between cleaning power and mop friction. Ideal for the washing of smooth surfaces with a medium degree of dirt.

### ENERGY-FUR

87% Polyester - 13% Polyamide

White **Microfiber** with blue stripes of brushed fiber with intensive action. Polyester, thanks to its hooked micro-structure, generates non abrasive mechanical action of dirt removal. Polyamide, due to its high absorbing power, retains water and the dirt removed. Ideal for the washing of smooth surfaces with a medium degree of dirt.

### PULI-BRUSH

50% Polypropylene - 40% Polyester - 10% Polyamide

The polypropylene inserts quickly loosen even the most stubborn dirt, which is then captured by the **microfibre**, leaving a perfectly clean surface. Ideal for medium to very dirty non-slip floors.

Ideal for the washing of smooth surfaces with a medium degree of dirt.

### ANTI BACTERIAL MICROFIBER

85% Polyester - 15% Polyamide

**AB-Plus microfibre**, thanks to a special anti-bacterial treatment of its fibers, is ideal to reduce the bacterial growth and risks of cross-contamination. It removes up to 99,98% of bacteria and fungi and it reduces growth of them thanks to the electrostatic action.

Ideal for the washing of smooth surfaces with a medium degree of dirt.

*Please, refer to page 11 for the washing instructions.*

## Tuft Line: special tufted mop for all surfaces

### High absorbency, lower friction and longer life

The Tuft line is composed by two kinds of mops: **Mastertuft** and **Dreituft**.

Thanks to the special closed-ring Tufting system, the yarn remains firmly sewn to the mop backing, guaranteeing a longer life of the mop.

**Tuft flat mops** are ideal for cleaning with wet, damp and disinfection mopping systems; they are perfect for any kind of floor.

The special thickly interwoven fabric allows a better distribution of the chemical material on the fiber structure. Better absorbency, a good mop friction for a cleaning without any effort. Available with pockets and colour-coded tags.

MOP SYSTEM

Filmop is the first Italian company designing and producing an innovative floor flat mopping system, overcoming the traditional ones employing string mops.

Filmop has conceived a new mopping system based on a flat plastic mop holder, named "Telaio Speedy®", to increase the size of the cleaning tool mopping the floor with important advantages in terms of time and collection of dirt.

Moreover, Speedy mop holders are foldable allowing to wring the mop without dropping it from the mop holder.

All Filmop mop holders can be equipped with **Lock System** that improves the cleaning of walls and ceilings just locking and unlocking the joint simply pushing up and down the special device using one's foot.

**NEW**

## ErgoSwing ergonomic system

The Speedy® mop holder is available in the **ErgoSwing** version, for higher performance and lower effort.

Folded mop holder to wring the mop

Spin the mop holder and let it drop onto the floor to open it

**Unlocked joint:** floor cleaning

**Locked joint:** cleaning of walls and ceilings

## Turn and double the face of clean!

**Duo Face** is the innovating combined system (mop holder + mops) designed by Filmop to simplify and optimize the cleaning of floors and vertical surfaces. The **reversible mop holder** and the **range of double-faced mops** allow to **double the efficiency** of the cleaning operations with one single system.

### Reversible mop holder

- Make full use of the double mop holder thanks to its two perfectly flat and reversible sides
- Fix the mop to the mop holder with 2 simple clicks: the special raised central part allows to insert the mop in the right position, its serrated external borders assure a stable and non-slip mop fixing
- Avoid any contact of the mop with your hands thanks to its foot-operated pedal devices
- Clean also the vertical surfaces very easily thanks to the Lock System technology
- Do not waste your strength: the central joint distributes the pressure uniformly onto the whole surface of the mop holder

### Double-faced mops

The two mop sides are made of 100% cleaning surface and matched together thanks to a special ultrasonic welding that makes seamless Duo Face mops **much more resistant** and **more hygienic**, as they have no pockets or extra material where dirt and bacteria would hide and grow.

Duo Face mops are **perfectly reversible**:

- **Turn the mop and double the square meters of surface:** use the first side of the mop, turn it and go on with the second side. 1 traditional mop cleans about 25 sqm, 1 Duo Face mop: 50 sqm.
- **Turn the mop and double the possible cleaning operations:** wash, turn and dry! Duo Face BAR-RIER mops are made with a special **waterproof barrier** inside that separates the two cleaning sides of the mop. Dry and wet finally together in one single mop.

### Duo Face ultra-microfibers

Duo Face mops are the outcome of a long and **careful planning** that has involved Filmop R&D department for a long time to reach the best final result: a wide range of double-faced mops to satisfy several and different cleaning needs, manufactured with **completely Made in Italy** and **high quality microfiber** material.

Duo Face microfibers guarantee the maximum performance concerning **collection of dirt, release of dirt** during washing, **mop running, quality** of final cleaning results, **durability and mop lifetime**.

**Unilav** is a wet mopping and/or disinfection tool for medium small areas, such as stairs, offices, bars, small shops with a medium degree of dirt. It is very useful for quick actions. In combination with microfiber cloths or with disposable cloths, it guarantees excellent cleaning results. Very simple and quick to use, light, handy and ergonomic.

Two types of refilling bottle: 650 ml and 1000 ml in different colours: red, blue, green and yellow.

The side-grip allows to regulate the release of cleaning solution: continuous flow or intermittent flow.

In order to have a complete disinfection system, Filmop offers also a **Unilav kit** that allows the operator to carry all the necessary equipment during the cleaning operations, optimizing working time.

**Sanety** tool is equipped with a special pierced "flowthrough" plate that allows a uniform distribution of the cleaning solution on the floor, thus avoiding waste of product.

## HOW TO PREPARE IT

Lift up the plastic cover and fix it to the handle grip.

Fill in the tank.

## HOW TO USE IT

Press and release the knob at the top of the grip for an intermittent wax flowing; press and block the knob for a continuous wax flowing.

The rubber cover on the knob on the handle grip avoids dirt and bacteria inside the hole and guarantees a more stable leaning of the tool against the walls.

# Mop soaking systems

Mop soaking on demand  
and pre-soaking system

## MOP SOAKING ON DEMAND AND PRE-SOAKING SYSTEM

### WHY CHOOSE A MOP SOAKING SYSTEM?

#### Advantages:

- **Reduced risks of bacterial cross-contamination:** always clean detergent solution and use of one mop for each room
- **Environmentally friendly:** higher control of chemical solution with reduced chemical and water waste, lower environmental impact if compared with traditional mopping systems employing bucket and mop
- **Better ergonomics:** no rinsing and wringing; consequently, less effort for the operator and reduced costs for industrial accidents and illness leaves
- **Easy to use:** simple to use, systems that make it easier to train the staff
- **Reduced costs for cleaning:** reduced working hours guarantee reduced labour costs
- **Excellent results in cleaning and hygiene:** thanks to the combination of mop soaking system and microfiber

### MOP SOAKING SYSTEMS

#### 1 Mop soaking system on demand:

Single mop soaking on demand directly on the trolley by means of the specific Equodose dosing station.

#### 2 Pre-soaking system:

Pre-soaking system in advance, preparing the mops before use, normally in specific places, employing hermetic **Top-Down®** buckets or **plastic drawers**.

## MOP SOAKING ON DEMAND AND PRE-SOAKING SYSTEM

# EQUODOSE®

PATENT PENDING

**Equodose** is the innovating **mechanical dosing device** developed by Filmop to make the **mop soaking on demand** directly on site. This system is designed with an **adjustable dosing mechanism** according to the features of the mops to use and the surfaces to clean.

### Features:

- **Totally mechanical and without electrical parts:** dosage is regulated by means of a graduated dial and operated thanks to a hand lever.
- **Strong and easy to maintain:** made of high quality polypropylene (Made in Italy), easy and low maintenance is required.
- **Safe and as by law enacted:** the graduated dial and tank can be blocked with the specific safety key device to avoid any tampering or improper use; hand level with push button to block the solution dispensing mechanism.
- **Modular design:** available with 1 or 2 tanks to increase the dosing system autonomy or to operate with two different detergents/cleaning solutions at the same time.
- **Versatile:** fitting Alpha line of trolleys. Suitable for several kinds of mops and mop holders: velcro system, pocket mop system and Duo Face mop system (only fitting 40 cm mop systems).

### Advantages:

- **Prompt and ready in the working place:** mop soaking on demand and directly on site, just the necessary mops, even one single mop!
- **Minimum overall dimensions:** ideal in environments where there is a lack of big spaces to prepare and stock the pre-soaked mops and the hermetic buckets.
- **Eco-friendly product, low environmental impact:** water and detergent saving, as this system allows to soak only the necessary mops, eliminating any unnecessary washing of unused reserve mops in the washing machine. No need of electric power, no need of power supply, made of 100% recyclable plastic.
- **Easy to use:** just a few and simple steps and the mops are ready to use, high intuitive system.
- **Flexible:** you can regulate very accurately the right solution for each single mop according to the features of the surface to clean, the degree of dirt and the absorbing capacity of the mop.
- **High standards of hygiene:** reduction of cross-contamination risks, making easy and simple to clean each room with a different and ever clean mop. Tanks preserve active principles of some chemical solutions that could become less effective over time: this system is ideal for hospitals and healthcare facilities.

## Dosing system

**Increased flexibility:** the 50 ml to 350 ml adjustable system ensures better detergent solution dosing precision also for the lightest cloths, such as surface mops for hand use, further reducing waste

## Sealed reservoir

**More effective:** hermetic tank thanks to the internal washer of the cap, better preservation of the cleaning solution

**Higher safety:** the cap locking system improves the safety level

**Better hygiene:** the reservoir design facilitates easy cleaning and good long-term maintenance

## How to use it

Rotate the graduated dial from 50 ml to 350 ml to choose the right dose of solution. If necessary, remove the safety key to lock the dial and keep the right dosage.

Push the mechanical hand lever completely down.

Take a clean mop and lay it in the tray ready for soaking with the cleaning side downwards. Wait for a few seconds for a complete and uniform mop soaking. This system is suitable for several kinds of mops, but only for 40 cm mop sizes.

**TOP-CLEAN SYSTEM**

**Top-Clean** is a cleaning system especially advised for the cleaning of desks, table-tops, tables, blackboards and walls in classrooms, schools, canteens, self-services, bars, restaurants and hotels. This mop holder combined with a traditional mop covers a wider working area than the one covered by the operator's hand using a simple cloth, thus saving time during cleaning operations; it is ergonomic and handy thanks to its grip.

## Surface cleaning with pre-soaking system

Place the 30 cm mops into the bucket with the backing support upwards.

Pour the right quantity of cleaning solution.

After 15 minutes the mops will be ready for use.

### ErgoSwing ergonomic system

ErgoSwing is the innovative system consisting of telescopic handle with turning grip and mop holder with ergonomic joint designed for **easy S movement**.

The system guarantees **less strain** and **increased productivity**, together with better floor cleaning performance.

- **ERGONOMIC:** 360° rotation hand grips for easier movement and sturdy grip
- **SAFE:** the rotation locking mechanism allows to safely place the tool against a support
- **EFFICIENT:** the system offers optimum performance, with significantly less effort required by the operator

PAT PENDING

### PROVED ERGONOMICS

In the long term, repeated wrist strain can cause muscle-skeletal issues and pathologies. The ErgoSwing system usability analysis carried out by Humana Consulting demonstrates a **significant reduction in wrist bending and extension movements** when compared with traditional systems.

ErgoSwing allows the user to significantly remain below the maximum tolerance level (45°), therefore preventing the development of work-related illnesses.

Standard systems subject the wrist to significant bending-extension movements (grey hand), while ErgoSwing allows to limit wrist movement, therefore reducing strain (blue hand).

### COMPATIBILITY

ErgoSwing is available with flaps, pockets, pockets-flaps, Velcro and blades

## **NEW** Duo Pro System

Duo Pro System is a **professional wringing system** consisting of a practical wringer and bucket. It's available with or without wheels, depending on specific needs.

Designed for use with the Duo Face reversible mop holder and the range of double-faced mops, it offers the **utmost efficiency** and **significant energy, time and cost savings**.

Duo Pro system is compatible with the Alpha trolley range.

- **It reduces strain:** the wringer is available in versions with **pressure wringing** and **lever wringing** system, for maximum ergonomics, convenience and ease of use
- **It saves time:** thanks to the combined efficiency of mop holder, mop and wringer, the system ensures **double cleaning** with **half the wringing** when compared with traditional systems
- **It reduces waste:** the high level of washing autonomy of microfibre allows to use **significantly less detergent**, therefore also decreasing the impact on the environment

BUCKETS AND WRINGER TROLLEYS

The **Top-Down®** buckets are equipped with an **hermetic cover**. They are ideal for pre-soaking, that is to say the preparation beforehand of the mops for the cleaning/wet mopping of floors and surfaces.

Hermetic system.

Quick and easy snap.

The plastic divider is ideal to keep the mops compact and to make it easier to pick them with the mop holder.

The pierced plastic sieve allows a uniform distribution of the cleaning solution, very important for a faster soaking.

Pre-soaking with 8-litre Top-Down® buckets for the cleaning of surfaces using the Top-Clean system.

For separate collection in environments such as offices, canteens and dining rooms, Filmop offers their **Patty bins linked up**: thanks to colour-coded lids and the **new removable linking system device**, which allows to combine either 25 L bins or 50 L bins together, it is possible to have an efficient waste collection area.

Today Patty bins 25 L and 50 L are available in the new version **complete with bag stretchers** to better support the waste bag.

The handy and coloured **Pick-up** containers have been designed for a green, hygienic and intelligent waste collection system. These bins are stackable; they have a front cover which can be fixed to the upper bin, saving space and making the waste collection operations quicker and easier. The colours and plates indicate the content of the bin.

Pick-up bins can be equipped with pivoting wheels to handle and transport them easier, especially during loading and unloading.

## EPD: Filmop's latest green goal

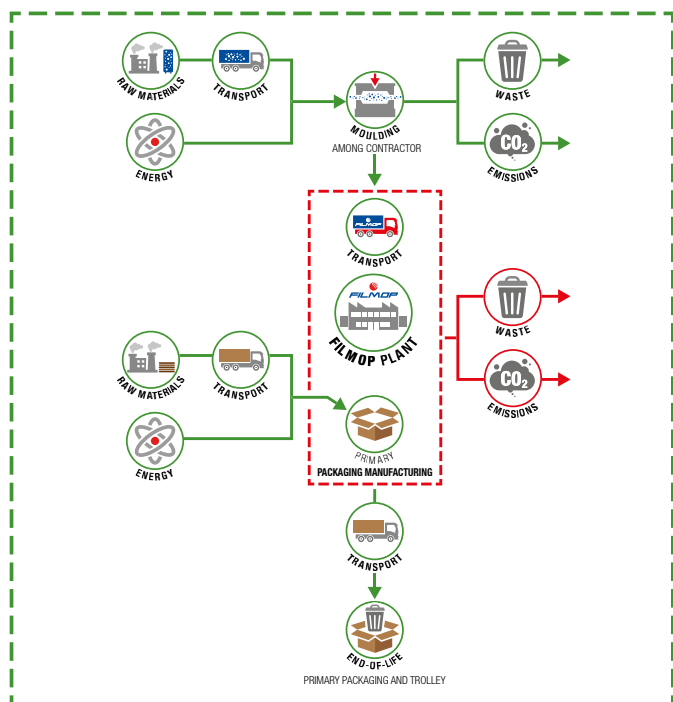

**EPD**<sup>®</sup>

In 2017 Filmop has obtained the **Environmental Product Declaration** for the **Alpha 260670** cleaning trolley equipped with hermetic **Top-Down** buckets.

This Declaration, better known as **EPD** (Environmental Product Declaration), is a document that communicates verified, transparent and comparable information about the life-cycle environmental impact of products and services, helping the development of the concept of green required by the European Union.

EPD is a **type III eco-label**: with this document Filmop has decided to grant **detailed information** on its production process, based on the evaluation of **LCA** (Life Cycle Assessment) as a system to identify and quantify the environmental impacts, estimating and declaring the uncertainty value for each impact category according to UNI 11698:2017 rule.

# A-B PLUS anti-bacterial system

A-B PLUS

## A-B PLUS

# 100% recyclable

**A-B Plus** is a complete cleaning system whose components have been treated with anti-bacterial additives in order to slow down the growth of bacteria, molds and fungi.

This cleaning system uses silver ion technology for microfiber and for some plastic components and Zinc Pyrithione for Alpha trolleys and their components.

The anti-bacterial additive, mixed during the production process, is part of the polymeric matrice and penetrates the cell wall of the micro-organism blocking its growth and reproduction functions.

The anti-bacterial treatment can be **guaranteed for the whole life cycle** of the product.

### Better hygiene and safety for everyone

- For end users: patients, children, old people, consumers
- For professional people: doctors, nurses, teachers and food operators
- For cleaning operators
- For environment

### A sanitization cleaning system for hospitals... and more than that

- Hospitals: both low-risk common areas and high-risk areas, such as operating theatres, infection disease wards, intensive care wards and similar environments
- Nursing homes
- Public facilities: schools, nursery schools, food industries, banks, airports, railway stations

## Alpha Hotel: new skills for a more functional and comfortable service trolley.

**Alpha Hotel** trolleys have a plain and simple design to fit any environment. Completely made of polypropylene, from the base, the vertical frames, the shelves to all their accessories, they are available in different versions: completely open or with closing panels and doors for the highest safety.

The Alpha Hotel range features utmost care of all details and a specific design conceived to ensure practicality, efficiency and functionality.

### Better functionality

The models with two storage units have a left opening door, for **convenience** and **practicality**.

Innovative closing mechanism to work safe

### Organize your services and work better

The versions without central vertical frame ensure **high trolley capacity**, so that everything that may be needed for the job can be right at hand.

### **NEW** Alpha Hotel Drive

Alpha Hotel Drive Trolleys can be used to move loads of up to 150 kg on several types of floors with slopes up to 12°, **without any strain** for the operator. Motor-driven trolleys are **easy to manoeuvre**, do not need to be pushed and provide **maximum safety**. Being **extremely quiet**, they do not cause disturbance, and are therefore ideal for cleaning and tidying activities inside welcoming establishments

### Unhook the trolley and go

Thanks to **Link-Up, the new hook system** designed by Filmop, it will be possible to separate the bag holder compartment from the rest of the trolley with a simple click.

The **new independent waste collection unit** allows to move around more freely and comfortably during all waste or laundry disposal operations and to gain access easier to small and reduced areas, such as elevators, small hallways and laundries.

Filmop proposes the new **door stopper with handle** as an useful accessory for the cleaning operations.

- **Universal:** fitting any kind of door
- **Non-slip:** the shaped rubber profile grants a good holding
- **Ergonomic:** innovative patented system to block and unblock the door stopper's handle easily and without a continuous bending
- **Safer:** it eliminates the continuous operations of door opening and closure
- **Non-marking:** the rubber profile protects the surface of doors and floors
- **Handy:** it can be easily hung to the cleaning trolley and carried
